To

Mrs. Manisha Khemlani

Chief Executive Officer

Central Chinmaya Mission Trust

***Hari Om Salutations !***

Respected Madam,

**Subject : Chinmaya Mission Hospital – Covid-19 pandemic**

The Second wave of Covid-19 has taken the city of Bangalore completely by surprise. The daily reporting of cases in Bangalore never exceeded 6000 during the First wave of Covid. Yesterday Bangalore has reported more than 22000 cases. A large number of people are looking at augmenting oxygen and ventilator support. It is important to note that we require trained and qualified personnel including Consultants & Nurses to handle patients on a ventilator. At present CMH has enough ventilators, and it does not have man power to manage additional patients on ventilator.

Covid-19 patients need to be treated by Health care workers whose safety is also paramount. A large number of other requirements for Covid-19 patients would be beneficial for managing Covid-19 pandemic. From that point we request you to consider the following for CMH.

Sl.No.	Requirements	Nos.
1	PPE (current use – 3000 nos. per month)	10000
2	3-ply Mask (current use 45000 per month)	1.5 Lakhs
3	N-95 Masks (current use 500 per month)	2000
4	Hand Sanitisers	50 Ltrs

These are required for Health Care workers.

Equipment which may be helpful include :

Sl.No.	Requirements	Nos.
1	DR Machine	01
2	Portable Ultrasound	02
3	Portable X-ray machine	01
4	Defibrillators	04
5	Infusion pumps	10
6	Syringe pumps	25
7	Dialysis Machines	04
8	5 Parameter cardiac monitor	10

The equipment that we have requested for, will continue to be useful even after the Covid pandemic is over.

Thanking you,

Yours faithfully,

  
**Dr. SUDHIR U**  
**MEDICAL DIRECTOR**  
 Medical Director  
 Chinmaya Mission Hospital
